1 Market Database Overview

The purpose of the Market Database is to drive transparency of a national Solar and Solar PAYG market through providing close to real-time insights into how the market is performing based on data contributed by multiple companies. This will allow Solar PAYG companies to benchmark their performance against the market and potential investors to understand the performance of the market at a high level.

The Market Database aims to provide a national overview of the Solar and Solar PAYG markets through six KPIs: Systems Sold, Quality verified systems sold, Installed Capacity, Systems Sold on PAYG, Portfolio at Risk (30 days), and Default rate.

A user can view the market KPIs at different geographic levels – country, district, county, and sub-county (in the Ugandan context). The Market Database provides a snap shot view of the market at the current moment in time.

The Market Database relies on the regular contribution of anonymised sales and payment data by participating companies to provide a current view of the market.

2 Running queries

2.1 Defining the query

The screenshot shows the 'Solar PayG market database' interface. At the top right, there is a 'Logout' button and a 'Last updated' section with a dropdown menu set to 'Last updated'. On the left, a navigation sidebar lists various categories: Query, Devices, Specifications, Geographics, Loans, Sales Summary, Companies, User Profiles, and Minimum companies reporting. The main area contains several input fields: 'Query' (set to 'Systems Sold'), 'Country' (dropdown menu), 'Output Option' (set to 'Table'), 'District' (dropdown menu), 'County' (dropdown menu), 'Sub-County' (dropdown menu), and a 'Run query' button at the bottom. The footer of the page includes the text '2016 © Village Power'.

Figure 1:Query input page

A query can be built by selecting the KPI and country of interest and then selecting the 'geographic level' of interest. For example, all districts or a specific district.

The user also selects whether they wish to get the query output in table form or represented geographically on a heat map. At the time of writing, the heat map functionality was only available at the District level.

2.2 KPI definitions

2.2.1 Systems sold

The total number of Systems sold across a range in sizes. This may range from solar lanterns up to large solar home systems.

The Overall Administrator is responsible for reviewing the details of models listed by the companies and maintaining a current view of the range of systems being reported.

2.2.2 Quality verified systems sold

Total number of systems sold that have achieved the quality verification of the IFC's lighting global initiative. Data on product quality verification status provided by the respective company.

2.2.3 Installed capacity

Reflects the aggregate Maximum Power Output (W) of the systems sold and is the sum of the number of each system model sold multiplied by the maximum power output of the model across all models captured by the Market Database.

2.2.4 Systems sold on PAYG

Total number of Systems sold on a company-administered PAYG plan.

2.2.5 Portfolio at risk

The sum of the outstanding balance on accounts which are overdue by 30 days or more divided by the sum of the outstanding balance on all PAYG accounts at the selected geographic level

An account is overdue by 30 days if the date that the next payment was due (as recorded by respective inputting company) occurred 30 days or more in the past

2.2.6 Default rate

Number of defaulted PAYG accounts divided by the total number of PAYG accounts at a selected geographic level (e.g., country or district)

A defaulted account is as defined and flagged by each company contributing data.

3 Query outputs

3.1 Table

Data at the select geographic level is shown on screen in tabular form. Use the number of rows button to select how many rows you want to see on one screen.

Use the button to select the number of rows to be displayed.

Download query data by clicking on the 'Excel' or 'PDF' buttons

4 Security & Access

4.1 Data Security

Only the Overall Administrator has access to the ‘raw’ data input by the respective companies in the Market Database

The Market Database, and access to the Market Database, is controlled by the Organisation administering it. A user must have appropriate credentials, as managed by the Organisation’s Overall Administrator in order to access the dashboard.

The decision of where to host the Market Database and the security implications associated with that choice are the administering Organisation’s responsibilities.

4.2 User profiles

There are three user profiles with difference access to the Market Database:

1. Overall Administrator
 - Manage overall company profiles
 - Manage data sets
2. Company Administrator
 - Manage company interface with Market Database (input system specifications, set up data inputs from company database to market database)
 - Review their company’s data uploaded to Market Database
3. User
 - Run queries of database

Table 1: User profile access rights

Tab	Overall Admin	Company Admin	User
Query	Set up and run queries	Set up and run queries	Set up and run queries
Devices	Read/write	<i>Company admin will be able to see the 'master devices list' as set by the Overall Admin and add specific devices relevant to their system usage</i>	No access
Specifications	Read/write	<i>Company admin will only be able see and edit their company's products specifications</i>	No access
Geographics	Read/write	No access	No access
Loans	Read/write	<i>Company admin will only be able to see their company's loan details</i>	No access
Sales summary	Read/write	No access	No access
Companies	Read/write	No access	No access
User profiles	Read/write	No access	No access
Companies reporting	Read/write	No access	No access

5 Market Database Tabs

5.1 Devices

A Company Administrator will use the ‘Devices Supported’ tab to capture the name and description of the devices supported by the various models that their respective company offers.

The screenshot shows a table titled 'Devices Supported' with the following data:

Code	Device	Description	Company	Company Id	Edit/Delete
004	Do radio	approx 5W	Master list	Master	
005	Solar TV	15-20 W	Master list	Master	
001	1W bulb	1W bulb	Master list	Master	
002	3W bulb	3W bulb	Master list	Master	
003	Mobile Phone Charger	approx 2W	Master list	Master	
006	Laptop computer	approx 40W	Master list	Master	
007	Desktop computer & printer	approx 50W	Master list	Master	
008	Fridge	approx 80W	Master list	Master	
009	Stereo	approx 40W	Master list	Master	
010	Water Pump	Water Pump	M-KOPA SOLAR Kenya	4	

Showing 1 to 10 of 12 entries

Figure 2: Devices supported screen shot

A new device can be added through the ‘Devices Supported’ pop up activated by the ‘New’ button. The ‘Company’ field is pre-set to the company associated with the profile used to log-in and is not changeable.

The screenshot shows a modal dialog titled 'Devices Supported' with the following fields:

- Company: A dropdown menu showing 'Master'.
- Code: An input field containing 'Code'.
- Device: An input field containing 'Device'.
- Description: An input field containing 'Description'.

At the bottom right of the dialog are 'Close' and 'Save' buttons.

Figure 3: Add new device supported pop up

A Company Administrator can also update the details of an existing device by selecting the device by clicking the check box on the far-left column and then clicking the pencil icon on the far-right column.

The screenshot shows a web-based application interface for managing devices. On the left, there's a sidebar with navigation links including 'Logout', 'Query', 'Devices', 'Specifications', 'Geographics', 'Loans', 'Sales Summary', 'Companies', 'User Profiles', and 'Minimum companies reporting'. The main content area has a title 'Devices Supported' and a sub-section 'New'. It displays a table of devices with columns 'Code' and 'Device'. The table contains 12 rows, each with a checkbox, a code (e.g., 004, 005, ..., 010), and a device name (e.g., Dc radio, Solar TV, 1W bulb, 3W bulb, Mobile Phone Charger, Laptop computer, Desktop computer, Fridge, Stereo, Water Pump). Below the table, it says 'Showing 1 to 10 of 12 entries 1 row selected'. In the center, a modal window titled 'Update Devices Supported' is open, containing fields for 'Company' (with a dropdown menu), 'Code' (containing '004'), 'Device' (containing 'Dc radio'), and 'Description' (containing 'approx 5W'). At the bottom of the modal are 'Close' and 'Update' buttons. To the right of the modal, there's a table with columns 'Company Id', 'Edit/Delete', and a search bar. The table lists 12 rows, all labeled 'Master'. At the bottom right, there are buttons for 'Previous', '1', '2', and 'Next'.

Figure 4: Editing devices pop up

The Overall Administrator can access all Devices entered by the respective companies and add any device that is ubiquitously supported to the Master List. Unique devices can be maintained by the respective companies.

The Master List is viewable by all contributing companies. The Unique Company lists are only viewable by the associated Company Admin. For overview of who can see what on this tab, see Table 1.

5.2 Specifications

On the 'Systems Specifications' page, a company admin can input the specifications of each of the company's models:

- Model name
- Installed (Yes/No)
- Number of devices supported in aggregate
- Number of individual devices supported
- Quality verification of model (Yes/No)
- Solar panel size (W_p)
- Max power output (W)
- Current (AC/DC)

Figure 5: Systems specifications tab

A Company Admin can see only the details of the Systems associated with their respective company (the drop-down menu at the top of the screen is pre-set and unchangeable to the Company Administrator's company).

An 'Overall Administrator' can see the details of all systems and can navigate between companies using the drop-down menu at the top of the screen and clicking 'Load'.

A Company Administrator can add a new system by selecting the 'New' button on the Systems Specifications page and inputting the details.

Figure 6: Add new model pop up

The following are field requirements for the System Specification inputs:

- Max power output (W) - No null value. Must be a number
- Model - No null value. Can be a mixture of numbers, letters, and spaces
- Solar panel (Wp) - No null value. Must be a number

- No. Devices supported - No null value. Must be a number
- Quality verified - No null value. Must be 'Yes' or 'No'
- Installed - No null value. Must be 'Yes' or 'No'
- Current – No null value. Must be 'DC' or 'AC'

5.3 Geographics

The ‘Overall Administrator’ can use the ‘Geographics’ tab to input all geographic segments of interest and keep these up to date

The screenshot shows a web-based application titled 'Geographics'. On the left, there is a sidebar with navigation links: Logout, Query, Devices, Specifications, Geographics (which is highlighted in blue), Loans, Sales Summary, Companies, User Profiles, and Minimum companies reporting. The main content area has a title 'Districts' and tabs for Counties and Sub-Counties. Below these are buttons for 'Import' and 'Logout'. A search bar at the top right says 'Search: []'. The main table lists 10 entries (out of 117 total) with columns for District, Lat-coordinate, Long-coordinate, and Edit/Delete buttons. The districts listed are ABIM, ADJUMANI, AGAGO, ALEBTONG, AMOLATAR, AMUDAT, AMURIA, AMURI, APAC, and ARUA.

District	Lat-coordinate	Long-coordinate	Edit/Delete
ABIM	1	2	[Edit] [Delete]
ADJUMANI	1	2	[Edit] [Delete]
AGAGO	2.83333	33.333332	[Edit] [Delete]
ALEBTONG	2.25458	33.34861	[Edit] [Delete]
AMOLATAR	1.60544	32.80845	[Edit] [Delete]
AMUDAT	1	2	[Edit] [Delete]
AMURIA	2.03017	33.64275	[Edit] [Delete]
AMURI	2.96579	32.08374	[Edit] [Delete]
APAC	1.98509	32.53445	[Edit] [Delete]
ARUA	3.03033	30.9073	[Edit] [Delete]

Showing 1 to 10 of 117 entries Previous [1] [2] [3] [4] [5] ... [12] Next

Figure 7: Geographics tab

5.4 Loans

A Company Administrator can view their company’s loan data held in the market database (the drop-down menu at the top of the screen is pre-set and unchangeable to the Company Administrator’s company).

The Overall Administrator can view all companies’ loan data held in the market database using the drop-down menu at the top of the screen and clicking ‘Load’.

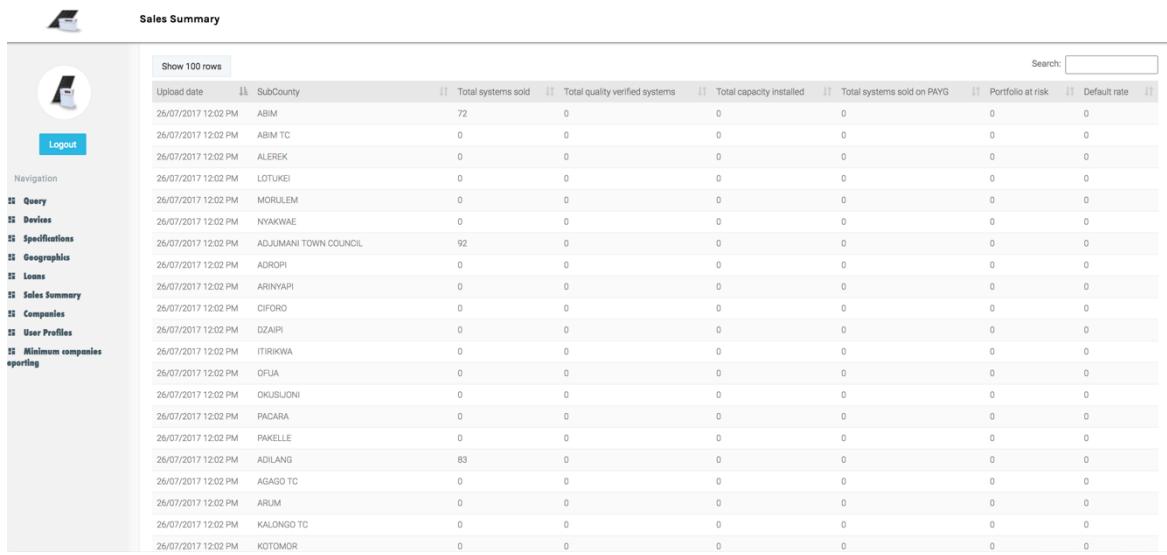

The screenshot shows a web-based application titled 'Loans Summary'. On the left, there is a sidebar with navigation links: Logout, Query, Devices, Specifications, Geographics, Loans (which is highlighted in blue), Sales Summary, Companies, User Profiles, and Minimum companies reporting. The main content area has a title 'Select Company' with a dropdown menu set to 'Village Power AG' and a 'Load' button. Below these are buttons for 'Show 10000 rows', 'Copy', 'CSV', 'Excel', 'PDF', and 'Search: []'. The main table lists 10 loans with columns for Company code, Client, Model, Sales mode, Loan type, Location, and various status details. The loans are categorized by location: KAMPALA, MASAKA, MUBENDE, KASANJE, MUKONO, WESTERN, Ibra-Mukono, Buwapsala, Busano sub-county Mbale district, Ibra-Eunice, Kasere Wome - Ibra, WOM - KASESE /IBRA, and another entry with partially visible data.

Company code	Client	Model	Sales mode	Loan type	Location	NP date	status	Outstanding balance (principal only, excluding interest)
2	9999	VP3	Cash		Uganda KAMPALA		0	MASAKA CLIENTS
2	10000	VP2	Cash		Uganda KAMPALA		0	MASAKA
2	10001	VP4	Cash		Uganda KAMPALA		0	MUBENDE
2	10002	VP6	Hire-purchase	Company	Uganda KAMPALA		0	KASANJE
2	10003	VP4	Cash		Uganda KAMPALA		0	KASANJE
2	10004	VP6	Hire-purchase	Company	Uganda KAMPALA		0	MUKONO
2	10005	VP2	Cash		Uganda KAMPALA		0	WESTERN
2	10006	VP2	Hire-purchase	Company	Uganda KAMPALA		0	Ibra - Mukono
2	10007	VP4	Hire-purchase	Company	Uganda KAMPALA	12/05/2016 00:00 AM	0	Buwapsala, Busano sub-county Mbale district, Ibra-Eunice
2	10008	VP2	Hire-purchase	Company	Uganda KAMPALA	09/05/2016 00:00 AM	0	Kasere Wome - Ibra
2	10009	VP4	Hire-purchase	Company	Uganda KAMPALA	08/05/2016 00:00 AM	Defaulted	WOME - KASESE /IBRA
2	10010	VP4	Hire-purchase	Company	Uganda KAMPALA			

Figure 8: Loans summary tab

5.5 Sales Summary

This tab captures the month-end totals at the sub-county level for each of the queries.

The screenshot shows a table titled "Sales Summary" with the following columns: Upload date, SubCounty, Total systems sold, Total quality verified systems, Total capacity installed, Total systems sold on PAYG, Portfolio at risk, and Default rate. The data is sorted by SubCounty. The table contains 26 rows of data, each representing a different sub-county with its respective sales figures.

	Show 100 rows	Upload date	SubCounty	Total systems sold	Total quality verified systems	Total capacity installed	Total systems sold on PAYG	Portfolio at risk	Default rate

Figure 9: Sales summary tab

5.6 Companies

The ‘Companies’ tab captures details on all companies reporting data. A company that is contributing data to the market database must have a profile created and managed on this tab.

The Overall Administrator has access to the ‘Companies’ tab and is responsible for inputting and maintaining this data.

The screenshot shows a table titled "Company profiles" with the following columns: Code, Company Name, Physical Address, Postal Address, Telephone, Email, Contact Person, and Edit/Delete. The data is sorted by Company Name. The table contains 5 rows of data, each representing a different company with its respective details.

	New	Show 10 entries	Search:				
Code	Company Name	Physical Address	Postal Address	Telephone	Email	Contact Person	Edit/Delete
2	Village Power AG	+256 897 654	+256 897 654	+256 897 654	+256 897 654	–	
4	M-KOPA SOLAR Kenya	+254 (0) 707 333 222	+254 (0) 707 333 222	+254 (0) 707 333 222	+254 (0) 707 333 222	–

8	Ferix International	+256 897 654	+256 897 654	+256 897 654	+256 897 654	Frederick Kasoma	
9	Sunshine Solar Ltd	+44 1508 488188	+44 1508 488188	+44 1508 488188	+44 1508 488188	Frederick Kasoma	

Figure 10: Company profile tab

The Overall Administrator can create a new Company profile through selecting the ‘New’ button on the ‘Company Profiles’ page.

Once a company profile is created by the Overall Administrator, that company is assigned an identifier number. This number must be included by the Company on their data inputs

Add New Company

Company	<input type="text"/>
Telephone No	<input type="text"/>
Physical Address	<input type="text"/>
Postal Address	<input type="text"/>
Email	<input type="text"/>
Contact Person	<input type="text"/>

Existing Companies:

Email	Contact Person	Edit/Delete
+256 897 654	-	
+254 (0) 707 333 222	-	
0800 700 700	-	
+256 897 654	Fredrick Kasoma	
+44 1508 488188	Fredrick Kasoma	

Figure 11: New company data input pop up

5.7 User Profiles

The ‘Overall Administrator’ can create and manage user profiles on the ‘User Profile’ tab.

User Profiles

First Name	Last Name	Organization	Email Address	Role	Edit/Delete
Fredrick	Kasoma	Village Power AG	kfredrick35@gmail.com	superadministrator	
Fredrick	Royal	M-KOPA SOLAR Kenya	fredrick@village-power.ug	administrator	
Josh	Josh	M-KOPA SOLAR Kenya	joshua@village-power.ug	investor	
Isaac	Tumusime	Village Power AG	isaac@village-power.ug	administrator	
Isaac	tumusime	Village Power AG	ainomugisha@gmail.com	administrator	
Annie	von Huelsen	SolarNow	annie@village-power.ch	administrator	

Figure 12: User profiles tab

5.8 Minimum companies reporting

The Market Database will only show the results of a query at a specific geographical level if a given minimum number of companies are reporting data in that given geographical level to preserve the anonymity of reporting companies. For example, if the ‘Minimum number of companies reporting’ for Districts is set at three an ‘All’ districts ‘Systems Sold’ query will return the systems sold totals in all Districts where three or more companies have reported sales data and return ‘Undisclosable’ in all Districts where less than three companies have reported sales data.

The Overall Administrator can set and change the threshold requirement of the minimum number of companies reporting data at a given geographical level (e.g., district) through clicking the ‘New’ button on the ‘Minimum number of companies reporting’ tab.

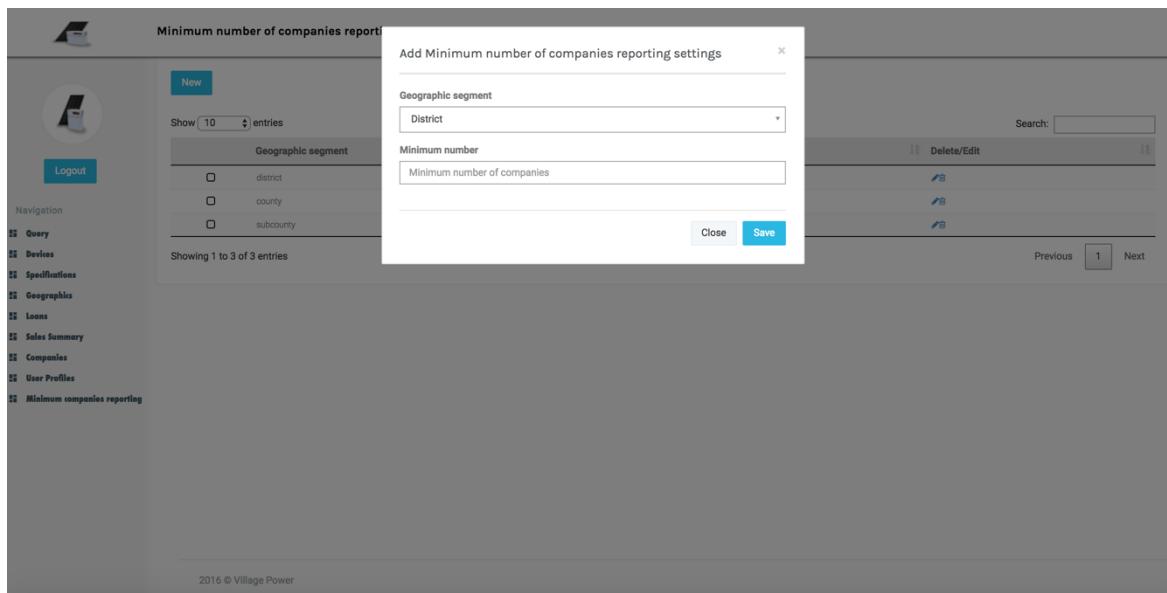

Figure 13: Adding a geographical segment and minimum number of companies reporting

Editing the minimum number of companies reporting can be done by selecting the box on the far-left column associated with the geographic level of interest and then clicking the pencil icon on the far-right column.

Minimum number of companies reporting			
	Geographic segment	Minimum number	Delete/Edit
<input type="checkbox"/>	county	2	
<input type="checkbox"/>	subcounty	2	
<input type="checkbox"/>	district	2	

Figure 14: Minimum number of companies reporting tab

6 Market database data input

Data inputs required from the Overall Administrator and the respective Company Administrators are outlined in Section 5. In addition to these inputs, the weekly Company data upload file requirements are outlined below. The following data is required on a sale by sale basis.

Field	Description	Constraints
CompanyId	A unique identifier supplied to the company by the Market Database administrator	integer not null. If Company ID in input does not match the company ID supplied by the Market Database Administrator, an error will be generated
LoanId	A unique loan identifier determined by the company	integer not null
Model	A unique model descriptor determined by the company	No null entries. Any model reference included here must match exactly the model names input into 'Systems Specifications'. If there is a model that is in the company upload but not yet entered in the system
SalesMode	whether hire or cash sale	Sales Mode - no null entries. All entries must be either 'Cash', 'Hire-purchase', 'Hire'
Country	country where sale was made	Country - No null entries. Name of country must align exactly (spelling, no spaces following name) with the official country list. At this stage the only
District	District where system was installed. If installation data is not available then District in which sale was made	District - No null entries. Name of District must align exactly (spelling, no spaces following name) with the official District list.
County	County where system was installed. If installation data is not available then County in which sale was made	County - No null entries. Name of County must align exactly (spelling, no spaces following name) with the official County list.
SubCounty	Sub-county where system was installed. If installation data is not available then Sub-County in which sale was made	SubCounty - No null entries. Name of Sub-County must align exactly (spelling, no spaces following name) with the official Sub-County list.
NextPaymentDate	For accounts in good standing, this is the date that the next installment payment becomes due. For accounts in bad standing it is the date that the account became overdue.	No null entries. Date format must be DD-MM-YY
defaulted_status	status of default for account	For Hire Purchase loans, where the account is in bad standing, ie defaulted or repossessed, this must be indicated as 'Defaulted' or 'Repossessed'
OutstandingBalance	outstanding balance against loan	No null entries. Must be numbers. If the account is paid up and there is no outstanding balance, 0, should be used.

Figure 16: Data input format

Data needs to be submitted via CSV file. For further details please see the Technical Documentation provided <https://villagepowerltd.github.io/oss-public/>.

7 Backup

The Organisation operating the Market Database is responsible for ensuring backup of the data contained within the Market Database.

8 User support

The Market Database is not formally supported by the developers.

The Market Database is provided as an open source tool for Organisations to use and tailor to their specific needs. The source code for the tool and the relevant examples are provided. Depending on demand and community engagement, a public repo may also be established for the tool.
